OBJECTIVES

To obtain a challenging position as a Senior .NET Developer or Mobile App Developer
To grow my career in a stable company and contribute to company's success

SUMMARY

- 12+ years of experience in enterprise Software Development
- 3 years of experience developing iOS, Android apps using native code and ReactNative
- Experienced in architecting, developing, testing and deploying web, desktop and mobile apps
- Experienced in design SQL database, writing complex stored procedures, and query tuning
- Strong analytical, problem-solving, and debugging skills
- Quick to learn new applications and tools

EDUCATION

Bachelor of Science, Electrical Engineering, May 2011

The University of Texas at Austin

Technical Concentration: **Software Engineering**

EXPERIENCE

Nov 2019 – Present

Senior Application Specialist, Enbridge – Houston, TX

- Develop and support several web apps for Gas Control rooms in US and Canada
- Create data migration jobs and reports for users
- Work in all phases of dev cycle: database, backend, front end, QA, deployment, support
- Tech used: C#, Asp.Net, Angular 2, SQL, DotNet Core, SSIS, Azure DevOps

Jun 2019 – Nov 2019

Senior Application Developer, Spark Energy – Houston, TX

- Main developer to convert old Dynamics CRM and Dynamics SL 2008 to 2018
- Architect and lead development of new billing system, introduce modern software practice
- Troubleshoot and fix legacy customer enrollment and billing applications bugs
- Develop jobs scheduler system and dashboard using Hangfire, Topshelf
- Tech used: VB, C#, Asp.Net, WPF, WCF, SQL, Dynamics CRM

May 2018 – Jun 2019

Application System Analyst, MD Anderson – Houston, TX

- Develop web applications and API to integrate with Epics Healthcare System
- Write Mumps/Cache code to extend/modify Epic System's functionality
- Obtain Epic certification in Chronicles Database and InterConnect
- Tech used: Angular 2, AngularJS, React, SQL, Web Api, Mumps/Cache

May 2016 – May 2018

Senior .Net and Mobile App Developer, The Go Solutions – Houston, TX

- Lead and mentor a team of 4 developers
- Develop several Windows Services, SSRS reports, Asp.Net MVC and Angular 2 applications
- Develop Android apps using Eclipse IDE, Java, SQLite, Google push notification (GCM)
- Develop iOS apps using XCode IDE, Swift, ObjectiveC, CoreData, Apple push notification
- Develop API services for mobile apps using Web API 2, WCF

- Develop containerized microservice using Docker
- Build and maintain internal Nuget server to store packages used internally
- Build TeamCity server and create build templates for automatic tests, builds and deployments
- Setup RabbitMQ server to serve as messaging system to ensure reliable message delivery

Nov 2014 – Sep 2015	<i>Software Consultant, Novasys Technologies – Houston, TX</i> • Developed ASP.NET MVC4 application for recording and displaying oilfield drilling data • Developed 2D and 3D real-time plot utilizing DyGraphJs, ThreeJs • Developed an equipment builder utility utilizing Angular, Web API, SQL
Sep 2013 – Nov 2014	<i>Software Consultant, Sparkhound – Houston, TX</i> • Developed web and desktop applications for several clients • Acquired great industry knowledge in oil & gas, healthcare • Tech used: Asp.Net MVC, AngularJS, WPF, WCF, Web API, SQL
Aug 2012 – Feb 2013	<i>ASP.NET Developer, ContentActive – Houston, TX</i> • Developed custom customer portal web applications for banks and oil & gas clients • Utilized Umbraco CMS to create public websites for clients • Technology used: Classic Asp, Asp.net MVC, Webforms, SQL, Telerik, DevExpress
June 2011 – July 2012	<i>Software Engineer, Fujitsu Network Communications - Richardson, TX</i> • Developed link monitoring system for connections between different cards/processors • Fixed customer-reported bugs and support infrastructure works • Created test plans and executed test cases to validate products' functionality and performance

TECHNICAL SKILLS

- **Web:** Asp.Net, Angular, React, Node.js, express.js, SignalR, socket.io, Redux
- **Desktop:** WPF, WinForms
- **Mobile app:** Native Android, Swift/iOS, ReactNative, Xamarin
- **Database:** SQL, MySQL, MongoDB, Redis
- **Language/framework:** C#, .Net, .Net Core, Java, Python, Dynamics CRM
- **Web services:** WCF, Web Api, RabbitMQ
- **Cloud:** Microsoft Azure, Azure DevOps
- **Reports:** SSRS, Crystal Reports, PowerBI
- **Design pattern:** N-tier, SOLID principles, factories, IoC, generic
- **Testing:** NUnit, Jasmine, Selenium
- **Tools:** Visual Studio, Eclipse, Git, TFS, Subversion, Team City, Docker, Postman

PROJECTS

Customer Portal – Web app

Web app that allow customers of business to register their account with email, Facebook or Google account, manage their account, make purchase, upload their documents, pay their bills, view usage and savings reports. I wrote the entire app.

Technology: Angular, RxJs, ngRx, Material UI, Web Api, OAuth2, Windows Service

Customer Portal – Mobile app

Android and iOS mobile app with same functionalities as the web app version, but with native mobile app features such as camera, scanning QR code, push notifications. I wrote the entire app in native Android (Java) and iOS (Swift)

Technology:

- Android: Java, SQLite, Google push notification (GCM), OAuth2, Android Studio
- iOS: Swift, Core data, Apple push notification, OAuth2, XCode
