OBJECTIVES

To obtain a challenging position as a Senior Software Developer
To grow my career in a stable company and contribute to company's success

SUMMARY

- 10+ years of experience in enterprise Software Development across diverse industries, including oil & gas, healthcare, banking
- Experienced developing both front end (React, Angular) and backend (Java and C#)
- Experienced in architecting, developing, testing and deploying web, desktop and mobile apps
- Experienced in applying AI/LLM to development, including AI agents, workflow automation, and intelligent application features
- Experienced in database design, query, index tuning for different database systems (Sql, MongoDB, PostgreSQL)
- Strong analytical, problem-solving, and debugging skills
- Quick to learn new applications and tools

EDUCATION

Bachelor of Science, Electrical Engineering, May 2011

The University of Texas at Austin

Technical Concentration: **Software Engineering**

EXPERIENCE

July 2022 – Present

Senior Full Stack Engineer, SLB – Houston, TX

- Designed and developed scalable full-stack applications and core microservices for SLB's DrillOps platform, consumed by multiple drilling applications.
- Designed and supported reliable two-way communication between remote drilling rigs and cloud-based services, ensuring real-time exchange of data and commands while handling intermittent connectivity, message delivery and data consistency.
- Developed complex, dynamic front end applications using Angular, React, NgRx
- Designed and integrated AI-powered workflows and agent-based automation into applications, leveraging LLMs to automate multi-step tasks, assist with troubleshooting, and streamline engineering workflows.
- Delivered measurable improvements in system performance and operational efficiency, through query & index optimization, caching, parallel processing, message payload compression, logging and monitoring.
- Collaborated with QA, SRE, Product Owners, managers, architects to resolve critical production issues and define new project requirements.
- Acted as a go-to technical resource for core applications, resolving complex bugs and production issues while providing troubleshooting guidance and mentoring to fellow developers.
- **Tech:** .Net, Angular, MongoDB, Redis, Azure Blob storage, Java, Spring, Kafka, AWS

Nov 2019 – July 2022

Senior Application Specialist, Enbridge – Houston, TX

- Develop and support several web apps for Gas Control rooms in US and Canada
- Create data migration jobs and reports for users
- Work in all phases of dev cycle: database, backend, front end, QA, deployment, support
- **Tech:** C#, Asp.Net, Angular, React, SQL, MongoDB, Azure, Java, Spring

Jun 2019 – Nov 2019	<i>Senior Application Developer, Spark Energy – Houston, TX</i> • Architect and lead development of new billing system, introduce modern software practice • Built customer enrollment and billing applications backend using Java, Spring Framework • Designed and developed new customer dashboard using React, Redux • Tech: Java, Spring Framework, React, Redux, PostgreSQL
May 2018 – Jun 2019	<i>Application System Analyst, MD Anderson – Houston, TX</i> • Develop web applications and API to integrate with Epics Healthcare System • Developed patient portal web app using Angular • Write Mumps/Cache code to extend/modify Epic System's functionality • Obtain Epic certification in Chronicles Database and InterConnect • Tech: Angular, SQL, Asp.Net Web Api, Mumps/Cache
May 2016 – May 2018	<i>Senior .Net and Mobile App Developer, The Go Solutions – Houston, TX</i> • Lead and mentor a team of 4 developers • Develop several Windows Services, SSRS reports, Asp.Net MVC and Angular 2 applications • Develop Android apps using Eclipse IDE, Java, SQLite, Google push notification (GCM) • Develop iOS apps using XCode IDE, Swift, ObjectiveC, CoreData, Apple push notification • Develop API services for mobile apps using .Net Web API, WCF • Develop containerized microservice using Docker • Build TeamCity server and create build templates for automatic tests, builds and deployments • Setup RabbitMQ server to serve as messaging system to ensure reliable message delivery • Tech: Java, Swift, Web API, Docker, WCF, SSRS, ASP.NET MVC, RabbitMq
Nov 2014 – Sep 2015	<i>Software Consultant, Novasys Technologies – Houston, TX</i> • Developed ASP.NET MVC4 application for recording and displaying oilfield drilling data • Developed 2D and 3D real-time plot utilizing DyGraphJs, ThreeJs • Developed an equipment builder utility utilizing Angular, Web API, SQL
Sep 2013 – Nov 2014	<i>Software Consultant, Sparkhound – Houston, TX</i> • Developed web and desktop applications for several clients • Acquired great industry knowledge in oil & gas, healthcare, bank & finance • Tech used: Asp.Net MVC, AngularJS, WPF, WCF, Web API, SQL
Aug 2012 – Feb 2013	<i>ASP.NET Developer, ContentActive – Houston, TX</i> • Developed custom customer portal web applications for banks and oil & gas clients • Utilized Umbraco CMS to create public websites for clients • Technology used: Classic Asp, Asp.net MVC, Webforms, SQL, Telerik, DevExpress
June 2011 – July 2012	<i>Software Engineer, Fujitsu Network Communications - Richardson, TX</i> • Developed link monitoring system for connections between different cards/processors • Fixed customer-reported bugs and support infrastructure works • Created test plans and executed test cases to validate products' functionality and performance

TECHNICAL SKILLS

- **Web:** Asp.Net, Angular, React, Node, SignalR, socket.io, Redux, NgRx
- **Language/framework:** C#, .Net Core, Java, Kotlin, Spring Framework, Python
- **Web services:** WCF, Web Api, RabbitMQ, Kafka, GraphQL
- **Database:** SQL, Sqlite, PostgreSQL, MongoDB, Redis
- **Cloud:** Azure, Azure Blob, Azure IOT hub, AWS, S3
- **Desktop:** WPF, WinForms
- **Mobile app:** Native Android, Swift/iOS, ReactNative, Xamarin
- **Reports:** SSRS, Crystal Reports, PowerBI
- **Testing:** NUnit, Jasmine, Jest, Selenium
- **Tools:** Visual Studio, IntelliJ, Git, Docker, Kubernetes, Kibana, Grafana, Prometheus

PROJECTS

Stock Ticker – Web app (personal)

Web app for tracking stock symbols, viewing price changes, and managing a personal watchlist with a clean dashboard interface.

Tech: Angular, .NET Web API, Chart.js, YahooFinanceApi

Demo: stock-ticker-1cux.onrender.com

Resume Builder – Web app (personal)

A tool to build beautiful clean resumes with pre-defined templates. User can export their resume as Pdf.

Tech: React, Redux, Socket.io, Semantic UI, MongoDB, Express.js

Demo: resume-builder-mvoq.onrender.com

Customer Portal – Web app

Web app that allow customers of business to register their account with email, Facebook or Google account, manage their account, make purchase, upload their documents, pay their bills, view usage and savings reports. I wrote the entire app.

Tech: Angular, RxJs, ngRx, Material UI, Web Api, OAuth2, Windows Service

Customer Portal – Mobile app

Android and iOS mobile app with same functionalities as the web app version, but with native mobile app features such as camera, scanning QR code, push notifications. I wrote the entire app in native Android (Java) and iOS (Swift)

Tech:

- Android: Java, SQLite, Google push notification (GCM), OAuth2, Android Studio
- iOS: Swift, Core data, Apple push notification, OAuth2, XCode
