

QUAN NGUYEN

Senior Full Stack Engineer

📞 832-679-9063 @qhn2017@gmail.com 🔗 Qnguyen2017.github.io 🇺🇸 US Citizen

EDUCATION

BS, Electrical Engineering

[The University of Texas at Austin](#)

📅 05/2011

SKILLS

Languages: Java, C#, Python, Kotlin

Backend: .Net, Asp.net, Spring Boot,
Rest Api, GraphQL, microservices,
Kafka, RabbitMq, SignalR

Frontend: React, Angular, Redux, NgRx

Database: MongoDB, PostgreSQL,
SQL, Redis

Cloud: Azure, Azure Blob, Azure IoT
Hub, AWS, S3

Testing: NUnit, Jasmine, Jest

Others: Prometheus, Grafana, Kibana

PROJECTS

Stock Ticker

🔗 [stock-ticker-1cux.onrender.com](#)

Web app for tracking stock symbols, viewing price changes, and managing a personal watchlist with a clean dashboard interface.

- Tech: Angular, .NET Web API, Chart.js, YahooFinanceApi

Flight Planner

🔗 [flight-planner-1-zmpl.onrender.com](#)

A hobby project built to explore flight search ideas - routing, pricing, demand simulation, and round-trip bundling - without relying on live airline data.

- Tech: Java, Spring Boot, PostgreSQL, React, Bootstrap

Resume Builder

🔗 [resume-builder-mvoq.onrender.com](#)

A tool to build beautiful, clean resumes with pre-defined templates. Users can export their resume as Pdf format.

- Tech: React, Redux, Socket.io, Semantic UI, MongoDB, Express.js

SUMMARY

Senior Software Engineer with 10+ years of experience building distributed systems, backend services, and full-stack applications across energy, healthcare, and financial services. Strong expertise in **C#/.NET** and **Java**, **microservices**, **cloud** platforms (**Azure**, **AWS**), messaging systems, and database performance optimization. Recent focus on AI/LLM-powered automation and agentic workflows.

EXPERIENCE

Senior Full Stack Engineer @ **SLB**

07/2022 - Present 📍 Houston, TX

- Contributed to the development of core DrillOps platform, building shared **microservices** that support essential drilling workflows across multiple downstream applications.
- **Led full-stack development** of Spectrogram and BHA Runs Manager flow as primary contributor on a 20-person team — enabling real-time MWD signal troubleshooting and centralized BHA run lifecycle management to **improve drilling execution** and **reduce operational downtime**.
- Implemented message batching/optimization, cloud-to-device command routing, and multi-deployment support across Prism environments/partitions, reducing outbound traffic and enabling secure command delivery to downstream DrillOps services.
- Implemented Trajectory Throttler to manage rapid trajectory update spikes (~1 update per 10ms), **reducing system traffic by ~99%** during data aggregation without affecting data quality.
- **Built an AI-powered developer knowledge assistant** that consolidated information from PDFs, internal wikis, user stories, and technical documentation, enabling developers to quickly retrieve business requirements, application guidance, troubleshooting information, and other engineering knowledge through natural-language queries.
- Served as a technical owner and **go-to engineer** for core Town/DrillOps services, resolving complex production issues and mentoring engineers across the team.

Tech: .NET, Java, Angular, React, MongoDB, Redis, GraphQL, Azure Blob, Spring, Kafka, AWS

Senior Application Specialist @ **Enbridge**

11/2019 - 07/2022 📍 Houston, TX

- Supported and enhanced multiple business-critical control-room apps, including Scheduler and Shift Log app, used by gas operations teams across the U.S. and Canada.
- Modernized many legacy ASP.NET Web Forms applications, by redesigning and rebuilding the frontend with **Angular** and **React** and backend services with Rest Apis, resulting in improved page-load performance, usability, and user adoption.
- Designed and implemented an **automated scheduling engine** that generated efficient shift arrangements, identified potential substitutes for time-off requests, and evaluated staffing constraints, qualifications, workload, and fatigue/rest-period limits to produce safe and balanced schedules.

Tech: C#, ASP.NET, Angular, React, SQL, MongoDB, Azure, Java, Spring

Senior Application Developer @ **Spark Energy**

06/2019 - 11/2019 📍 Houston, TX

- Led the buildout of a new billing platform, introducing more modern development practices during the transition.
- Delivered backend services for customer enrollment and billing using Java and Spring.
- **Launched** a new customer dashboard in **React** and **Redux**, giving users a more modern self-service experience.

Tech: Java, Spring Framework, React, Redux, PostgreSQL

Application System Analyst @ **MD Anderson**

05/2018 - 06/2019 📍 Houston, TX

- **Modernized** a manual laboratory workflow by replacing paper-based notes and Excel sheets with an **Angular** application backed by a centralized **Sql** database, enabling lab staff to visualize and manage blood-sample trays while improving data accuracy, accessibility.
- Extended Epic functionality through MUMPS/Cache development to support organization-specific workflows.

Tech: Angular, SQL, ASP.NET Web API, MUMPS/Cache

Senior Developer @ The Go Solutions05/2016 - 05/2018  Houston, TX

- Led and mentored a team of 4 developers, increasing delivery capacity across web, mobile, and service-based projects.
- Delivered Windows services, SSRS reports, and ASP.NET MVC and Angular applications that expanded internal and client-facing capabilities.
- Built Android applications in Java and SQLite with push notifications for mobile user workflows.
- Delivered iOS applications in Swift and Objective-C with Core Data and push notifications.
- Built .NET Web API and WCF services that enabled mobile applications to integrate with backend systems.
- Introduced containerized microservices with Docker, modernizing parts of the application architecture.
- Set up TeamCity and reusable build templates that improved automation for testing, builds, and deployments.
- Implemented RabbitMQ messaging infrastructure to support more reliable message delivery between systems.

Tech: Java, Swift, Web API, Docker, WCF, SSRS, ASP.NET MVC, RabbitMQ

Software Consultant @ Novasys Technologies11/2014 - 09/2015  Houston, TX

- Built an ASP.NET MVC application that improved access to recorded and real-time oilfield drilling data.
- Created 2D and 3D real-time plotting capabilities using Dygraphs and Three.js, improving data visualization for users.
- Delivered an equipment builder utility with Angular, Web API, and SQL that streamlined equipment configuration workflows.

Software Consultant @ Sparkhound09/2013 - 11/2014  Houston, TX

- Delivered web and desktop applications for multiple clients across varied business needs.
- Built domain knowledge across oil and gas, healthcare, banking, and finance, helping adapt solutions to different client environments.

Tech: ASP.NET MVC, AngularJS, WPF, WCF, Web API, SQL

ASP.NET Developer @ ContentActive08/2012 - 02/2013  Houston, TX**Software Engineer @ Fujitsu Network Communications**06/2011 - 07/2012  Dallas, TX
